Experience

AI Engineer **November 2025 - Present**
Lynkup *San Antonio, TX*

- Shipped end-to-end features using **React** backed by **REST APIs** and WebSockets for live technician sessions, supporting **10,000+** daily requests
- Designed and deployed a document ingestion and indexing pipeline for **25,000+** HVAC manuals using OpenSearch
- Built a real-time **voice AI agent** for **700+** trade technicians using LiveKit, enabling hands-free troubleshooting
- Engineered configurable workflows that guide AI agents through task-specific actions, boosting adaptability by **82 %**

Software Developer Intern **September 2025 - November 2025**
Hone Health *New York, NY*

- Optimized backend **(.Net)** performance by **38%** through **Redis** caching of high-frequency EF queries
- Integrated **Azure Application Insights** with Hangfire to improve observability and reduce server downtime by **12%**

Software Developer Intern **May 2025 - August 2025**
BECU *Seattle, WA*

- Enhanced and maintained production lending systems within an Agile team serving **1.5M+** users
- Built internal tools using **React** and **.NET Core**, improving workflows for **1,400+** employees
- Developed **50+** C# unit tests, improving code reliability and development velocity

Software Developer Intern **June 2024 - November 2024**
Better Futures Institute *San Antonio, TX*

- Reduced application registration time by **50%** by integrating OCR into a React Native application
- Built a **RAG-based LLM application** using LangChain, increasing user engagement by **20%**
- Constructed a **CI/CD pipeline** using GitHub Actions, reducing development time by **25%**

Projects

Founder (blobit.ai) **March 2025 - Present**

- Admitted to Founders Inc Canopy
- Built a **Python-based REST API pipeline** for LLM-driven 3D asset generation, serving **180+** users
- Engineered an async **Rust CLI** using clap-rs and **Codex** skill for agents to generate and manage 3D assets
- Developed asynchronous job orchestration for long-running AI inference workflows with status polling
- Deployed containerized ML systems with Cloudflare R2 storage, supporting **2K+** monthly inference requests

Open Source Contributor - uv **December 2024 - Present**

- Contributed to uv, a **Rust-based Python package manager**, through feature proposals and implementation design
- Fixed user-reported Git dependency issue involving submodules and relative paths impacting **200k** users
- Implemented configurable file logging using the Builder pattern for extensible developer-facing workflows
- Developed snapshot test suites using Insta to prevent regressions in package resolution behavior

Skills

Languages & Frameworks: Python, TypeScript, JavaScript, C#, Rust, React, React Native
AI/LLM: LLM Agents, RAG, Agentic Workflows, Voice AI, LiveKit, LangChain, Mem0
Backend & Infra: REST APIs, .NET Core, AWS, Azure, Docker, GitHub Actions
Databases/Search: PostgreSQL, OpenSearch, Redis, MongoDB, Entity Framework

Education

Trinity University **San Antonio, TX**
Bachelor of Science (B.S.) in Computer Science – Minor: Mathematics *GPA: **3.9***

- Coursework: Functional Programming, Probability and Statistics, Linear Algebra, and Operating Systems
- Campus Involvement: Teaching Assistant, Student Researcher, Resident Assistant and Orientation Leader
